Dogs are prohibited from most trails, beaches and developed areas for the following reasons:

To protect park resources – Dogs are predators by nature, and their presence or lingering scent will disturb and frighten wildlife nearby. Dogs can transmit diseases and parasites to native animals, including foxes, coyotes, and deer. Dogs that run loose or become lost often harass or kill park wildlife.

For the safety and enjoyment of other visitors

- Some people are intimidated by dogs, even by friendly ones. Dogs reduce the amount of wildlife that hikers are likely to see. Also, dog waste along trails is a nuisance to encounter and may contaminate the local water supply.
